

Appendix B: Table of Contents of the 13th Administrative Report

I. Introduction.....	1
Historical Overview	1
New Activities	3
Continuing Activities	4
CRSP Continuation Plan	6
CRSP Administrative Reports	7
 II. Summary of Activities and Accomplishments	 8
Global Studies & Activities	8
Central America	10
East Africa	12
Southeast Asia	13
United States –	
Data Analysis and Synthesis	16
Special Topics Research.....	17
 III. Program Background	 18
The CRSP Research Program	18
CRSP Work Plans	19
 IV. Abstracts of Technical Papers	 20
A. Global Experiment and Related Investigations.....	20
Effect of Pond Management Strategy on Nutrient Budgets	20
Experimental Evaluation of Lime Requirement Estimators	
for Global Sites	20
Experimental Evaluation of Lime Requirement Estimators	
for Global Sites- Isolation Column Experiment	21
Phosphorus Adsorption Capacity and Availability of Added	
Phosphorus in Soils from Aquaculture Areas in Thailand	21
Problem Perceptions, Production Practices, and Economic	
Incentives for Tilapia Producers in Four PD/A CRSP Countries	22

Central Data Base	23
B. Central America	23
Characterization of Shrimp Farm Effluents in Honduras and Chemical Budget of Selected Nutrients	23
Relationships among Stocking Density, Survival and Yield in Ponds Affected by the Taura Syndrom During Wet and Dry Seasons in Honduras	24
Nitrogen Fertilization in the Presence of Adequate Phosphorus	24
Effect of Diet Protein on Food Conversion and Nitrogen Discharge during Semi-Intensive Production of <i>Penaeus vannamei</i>	25
C. East Africa	26
Masculinization of Nile Tilapia (<i>Oreochromis niloticus</i>) through Immersion in 17 α -Methyltestosterone or 17 α -Methyldihydrotestosterone	26
Maximum Voluntary Feed Intake and Growth of Nile Tilapia Fry as a Function of Water Temperature	26
Characterization of African Soils and Site Evaluation	27
Reproductive Efficiency of Nile Tilapia (<i>Oreochromis niloticus</i>) and Red Tilapia (<i>Oreochromis spp.</i>) and a Comparison of Fry Growth and Susceptibility to Being Sex Reversed	28
Growth and Efficiency of Sex Reversal of Nile Tilapia (<i>Oreochromis niloticus</i>) Fed 17 α -Methyltestosterone-Treated Feed Stored Under Different Storage Regimes	28
D. Southeast Asia	29
The Effects of Fertilization on Growth and Production of Nile Tilapia in Rain-Fed Ponds	29
A Finishing System for Large Tilapia	30
Stocking Density and Supplemental Feeding	30
Carp/Tilapia Polyculture on Acid-Sulfate Soils	31
Diel Cycles of Temperature and Dissolved Oxygen Stratification in Deep Rain-fed Ponds	31
Carbon Dioxide Exchange between Pond Water and the Atmosphere	32
Growth Comparison of Three Strains of Nile Tilapia in Fertilized Ponds	32
Polyculture in Deep Ponds	33
Outreach Assistance	33
Effect of Pond Size	34

E. United States	34
Decision Support for Pond Aquaculture: Simulation Models and Applications	34
Decision Support for Pond Aquaculture: Parameter Estimation Techniques	35
Aquaculture Pond Modeling for the Analysis of Integrated Aquaculture/ Agriculture Systems	35
F. Special Topics Research.....	36
Stochastic Modeling of Temperature and Dissolved Oxygen in Stratified Fish Ponds	36
Sex Reversal of Tilapia: 17- α Methyltestosterone Dose Rate by Environment, and Efficacy of Bull Testes	36
V. Public Service.....	38
Institution Building	38
Education and Professional Development.....	39
Thailand, Honduras, and United States	39
Degree programs	40
Linkages	42
VI. Project Development	45
Development of Sustainable Aquaculture Systems	46
Socioeconomic Studies	47
Participation in International Scientific Meetings and Conferences	48
VII. Program Management and Technical Guidance	51
Advisory Groups	54
Board of Directors	54
Technical Committee	56
External Evaluation Panel	58
CRSP Administrative and Technical Reports	60
VIII. Financial Summary	64

IX. Staff Summary	66
X. CRSP Publications	70
Data Analysis and Synthesis Team	70
Egypt.....	72
Honduras	73
Indonesia	76
Panama ~ Aguadulce	78
Panama ~ Gualaca	79
Philippines	80
Rwanda	81
Thailand	84
Research Reports	88
Data Reports	90
Other Publications	91
Appendices	
A. Acronyms	93
B. Contents of Thirteenth Annual Technical Report	95
